LAHORE GARRISON UNIVERSITY ENVIRONMENTAL AWARENESS AND TRAINING PROGRAMS

In line with the *Policy on Institutional Sustainability and Climate Action*, Lahore Garrison University undertakes a wide range of awareness campaigns, training sessions, and outreach efforts to embed environmental responsibility across academic, operational, and community spheres.

The university conducts specialized training sessions on waste segregation, digital transformation, green infrastructure, and sustainable food practices. These sessions equip students, staff, and faculty with practical skills and campus-wide awareness to foster environmentally responsible behavior.

LGU hosts multiple awareness-based seminars across various faculties, focusing on critical environmental topics such as climate change, biodiversity conservation, sustainable urban development, and renewable energy. These seminars facilitate interdisciplinary exchange and promote environmental literacy.

Faculty Development Programs (FDPs) feature prominently, with dedicated modules that integrate Artificial Intelligence (AI) into pedagogy and curriculum design. These programs advance eco-conscious education and support data-informed environmental decision-making.

For community engagement, female students regularly visit and teach children in 25 nearby villages, delivering lessons on sustainability, hygiene, and climate resilience. Additionally, LGU faculty members contribute to Lidhar School, providing academic support and environmental education to underprivileged students—demonstrating LGU's commitment to inclusive outreach and social responsibility.

Together, these initiatives strengthen LGU's mission to institutionalize sustainability, align with the United Nations Sustainable Development Goals (SDGs), and nurture future-ready, environmentally conscious leaders.
